Each unit can bear a heavy weight of 100 kg

Tesler Mendelovitch is a design studio founded by Orli Tesler and Itamar Mendelovitch. Based in Tel Aviv, Israel, the studio has gained recognition for its pioneering work .in the field of textiles and product design

Captivating the world of design with their unique aesthetic appeal, the patterns and textures created through the layering and manipulation of wood veneer are visually captivating and offer a fresh and innovative .approach to materiality

The studio's innovative wood textiles have found applications in various fields, including fashion, interior design, and architectural installations. Their work has been showcased in renowned design exhibitions, and their creations have been featured in prominent publications

Linski Design pioneers imaginative artistic finishes for architectural and interior design ventures. Shmuel Linski (BA des) and Lotem Selz (MBA des) are the minds behind this studio, working closely in unison across all facets.

As a creative studio, they embark on an eternal quest for fresh combinations of materials and techniques, embodying the spirit of adventurers and explorers. Their ability to seamlessly merge traditional craftsmanship with cutting-edge technology in unconventional and innovative ways sets them apart.

Operating across a diverse range of domains, the studio collaborates with galleries and studios while also crafting their own exclusive limited-edition art pieces.
